Hmmmm. So I guess you want the attachment as well. Picky, picky.

**Importance:** High

The draft presentation is attached. Rick, the document has not been reviewed by George, Hans, Ted or Roger as I had hoped because I did not complete the draft in time for them to review.

Joy, Please make sure Rick doesn't leave today unless he has a copy.

Thanks to all.

Candace,

The presentation looks quite good, although it seems a bit long. You may have to rent a ballroom just for this presentation. However, that's your problem.

Some minor comments.

Slide 8:

Footnote 2 appears to be inappropriate here. Slides 7 and 8 simply list the ideal surveillance system according to the IOM. Therefore, why is it necessary at this point to mention how you are going to determine biomarkers of exposure to tobacco products in the first phase?

Slide 9:

In line 8 either there should be a comma after the word "and" and before the word "by", or there should be no comma after the word "design" and before the word "do".

Slide 16:

In the second line of the two lines before the bullet point, the word "of" between the words "to" and "PREP" should be deleted.

In line 9 of the bulleted text there should be a "close parenthesis" after the words "inhalation patterns".

In line 10 there should be a "close parenthesis" after the words "quit attempts".

Slide 18:

I am totally confused by the first sentence in the second column, "Documented information re: compensation will likely come from clinical studies, although no compensation studies are currently planned." It sounds like you are saying that you will not do the studies that you are planning to do. Am I out in left field?

Slide 23:

In line 2 of the first sub-bullet under the first bullet, the word should be "differently".

Slide 24:

The second sentence of the second paragraph does not seem correct to me, "Identification of biomarkers of exposure to be measured will be based on reduce harm claims made in the final PREP products." Wouldn't it be better to say, "Identification of biomarkers of exposure to be measured will be based on those substances that have been reduced in smoke and that would appear to be associated with tobacco-caused harm based on a weight of the evidence approach."

Slide 29:

In line 3 of the second paragraph shouldn't "PREPs" be plural?

Well that's it. If you need someone to carry your suitcases down to New Orleans, let me know. I lived in New Orleans for 18 months many, many years ago. Although I hated living there (the climate), I love to visit. Of course it's been many years since I visited. It has likely changed.

Ted
